

The Specialty Coffee Association
of America has awarded
Zoomski's Coffee Shop

The Golden Cup Award

*This award recognizes excellence
in brewed coffee.*

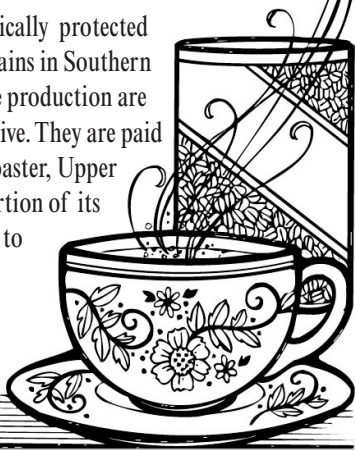

All our coffees are Fair Trade and Organic

Coffee is a very labor-intensive crop grown in regions of the world that are known for their poor working conditions and wages. Entire families work together, and this often means very young children are working so that their families can make enough money to eat.

Families that are involved in a Fair Trade Cooperative can actually send their children to school instead of out to pick coffee beans.

*Come in and try our Mexican Chiapas
Biosphere Reserve Café Femenino*

This coffee is grown in an ecologically protected area of the Sierra Madre Mountains in Southern Chiapas. All aspects of the coffee production are run by a women-owned cooperative. They are paid above the fair trade price. Our roaster, Upper Midwest Gourmet, donates a portion of its sales of all Café Femenino beans to battered women shelters.
